

# GitHub Issue #11 Update — Source Review Complete

---

**Status:** Task complete

**Branch:** `integrate/evidence-search`

**Commits:** `b87fd30` (register integration), `93e5cf1` (findings)

**Findings document:** <docs/wexford-source-review-findings.md>

---

## What Was Verified

---

- ✓ **9 of 10 sources accessible** and content matches register descriptions
- ✓ **All 6 staged candidates verified** against exact source passages
- ✓ **Event dates, publication dates, and date precision accurately preserved**
- ✓ **Evidence types correctly classified** (OFFICIAL\_STATEMENT, OFFICIAL\_REPORT, OPERATOR\_STATEMENT, OFFICIAL\_DESIGNATION, OFFICIAL\_ASSESSMENT)
- ✓ **Rights status UNKNOWN is accurate** — public availability does not establish reuse permission
- ⚠ **1 source blocked:** WCC SFRA consultation portal (alternative access needed)

## Source Verification Summary

| Source        | Provider               | Status     | Key Finding                                                   |
|---------------|------------------------|------------|---------------------------------------------------------------|
| wcc-plan      | Wexford County Council | ✓ Verified | “Variation No. 1, adopted 13th July 2026”                     |
| epa-slaney    | EPA / Catchments.ie    | ✓ Verified | May 2024 report, “based on data up to 2021”                   |
| ue-tagoat     | Uisce Éireann          | ✓ Verified | €6.7m, Kilrane→Rosslare, spring 2027                          |
| rosslare-plan | Rosslare Europort      | ✓ Verified | €350m (5 components: masterplan, digitisation, BCP, N25, ORE) |
| npws-slaney   | NPWS                   | ✓ Verified | SAC 000781 (Carlow, Wexford, Wicklow)                         |
| npws-harbour  | NPWS                   | ✓ Verified | SPA 004076 (Wexford)                                          |
| mara-map      | MARA                   | ✓ Verified | ArcGIS link identified; layer metadata pending                |
| opw-flood     | OPW                    | ✓ Verified | Portal accessible; scenario/date inspection outstanding       |
| wcc-planning  | Wexford County Council | ✓ Verified | Planning search portal accessible                             |
| wcc-sfra      | Wexford County Council | ✗ Blocked  | Consultation portal verification challenge                    |

## Three Recommended Demonstration Cases

### 1. Wexford Harbour / Slaney Estuary

**Buyer decision:** “What environmental and planning evidence affects this harbour/estuary proposal?”

**Available evidence (5 records):**

- Protected-site designations (SAC 000781, SPA 004076)

- Water-quality status (harbour waterbody: Moderate, at risk; 2016–2021 data)
- County plan variation (2026-07-13)

**Missing before demonstration:**

- Proposal geometry (which development?)
  - Live 2025–2026 monitoring (EPA uses 2021 data)
  - Approved layer reuse permissions
  - Passage-level source anchors
- 

## 2. Rosslare-Kilrane-Tagoat

**Buyer decision:** “Which infrastructure dependencies affect wastewater-dependent development delivery?”

**Available evidence (5 records):**

- UÉ Tagoat project (€6.7m, Tagoat → Kilrane → Rosslare, spring 2027 forecast)
- Rosslare €350m investment (5 separate components)
- Rosslare Harbour waterbody (HMWB, under review)

**Missing before demonstration:**

- Separate project stages (completed vs. forecast milestones)
  - Funding and approval sources
  - Verified asset identities (does “Rosslare WWTP” match EPA records?)
  - Individual Rosslare component status
- 

## 3. Enniscorthy / Slaney

**Buyer decision:** “What flood, water, and planning evidence must be considered together for a site near Enniscorthy?”

**Available evidence (5 source categories):**

- Slaney water-quality assessments (2016–2021 data)
- OPW flood-map layers (national and community-scale; scenario pending)
- Protected-site designation (SAC 000781)
- Planning portal search
- County plan (2022–2028 + Variation 1)

**Missing before demonstration:**

- Inspected flood layer metadata (AEP scenario, climate scenario, date)
  - Selected public planning case
  - SFRA access (blocked; alternative route needed)
  - Site-specific intersection (waterbody/flood/protected boundary)
- 

## Remaining Blockers

### High Priority

- [ ] **Rights/permissions:** Seek embedding/redistribution approval from WCC, NPWS, EPA, OPW

- [ ] **Case selection:** Choose one real public proposal per case with the buyer (as stated in delivery plan)

## Medium Priority

- [ ] Retrieve WCC SFRA (consultation portal blocked)
- [ ] Inspect OPW flood-map layer metadata (scenario, climate, date, defences)
- [ ] Inspect MARA layer catalogue and API
- [ ] Identify one real planning application per case area
- [ ] Extract passage-level anchors (PDF page/section) for each candidate

## Next Small Implementation Task

**Recommendation:** Task 1 from delivery plan — **Approve source permissions and select the three cases**

### Why this task first:

- No source import, adapter work, or map implementation can proceed without:

1. Knowing which sources are permitted for embedding/export
2. Knowing which real proposals anchor each demonstration
3. Defining measurable scope (5–10 reviewed claims per case, not county-wide)

### Concrete deliverables:

1. Rights status updated per source (GRANTED / DENIED / CONDITIONALLY\_GRANTED / RE-MAINS\_UNKNOWN)
2. One real current proposal identified per case (with buyer)
3. Demonstration scope confirmed (claim count, geography, acceptance criteria)

**Estimated effort:** 2–3 days (depends on rights response times and buyer availability)

## What This Enables

- ✓ Honest map showing 2021 water quality, protected sites, operator plans, and county policies
- ✓ Explicit coverage gaps (no live 2026 data, no proposal-specific analysis)
- ✓ Source-linked evidence (once passage anchors extracted)
- ✗ Cannot yet anchor to a real buyer proposal
- ✗ Cannot show live measurements
- ✗ Cannot embed layers or export evidence briefs without permissions
